

A Solution for a Bird Free Boat Lift

Sleek design and clear fishing line allow for a clean, aesthetically pleasing look.

Gulls Away unique designs are manufactured for durability.
(Specify type of lift to accommodate frame style when ordering)

Shore Brothers
P.O. Box 1358
Bemidji, MN 56619
(218) 335-8136

Designed to accommodate most lift styles.

**A Bird Deterrent System
That Actually Stops Birds
From Landing On Canopies**

- 1** The mounting bracket easily attaches to your boat lift frame (whether it is square or round).
- 2** The rod fits perfectly around your boat lift cover and extends over the top of your lift.
- 3** The top of the rod includes a hole where standard fishing line is inserted and tied off. A diagonal pattern is strung from rod to rod which deters the birds from landing.

It's that easy!

Gulls Away hardware rod system is economical, aesthetically pleasing, easy to install, and will last for years!

Gulls Away J.M.

**No more stench, hard to remove stains,
or problems with birds on your boat lift.**

**Lightweight hardware
attached to lift frame.**

**Hardware attached to lift frame
extending beyond canopy height.**

**Fishing line strung diagonally
resulting in a bird obstructed
landing zone. End Result is a bird
free, clean canopy cover with
minimal impact to appearance.**

Four Gulls Away hardware rods recommended for lifts 26 ft. or less. Six to eight Gulls Away rods recommended for lifts over 26 ft. Number of Gulls Away hardware rods is dependent on type of lift, size and bird saturation in the usage area.

**Recommended line
configuration for lifts 26 ft. or less.**

**Recommended line
configuration for lifts over 26 ft.**

**20 - 30 lb. test fishing line recommended
(included with each order)**

**Specify style of boat lift when ordering to
accommodate frame.**
